<small>POSTED: SEPTEMBER 20</small> The Outbound Ghost is a charming indie-game made by young Conrad Grindheim, founder of Conradical Games who also made the fun puzzler Girabox. The Outbound Ghost is not a puzzle, although there are little mini puzzle-like events that are reminiscent of Undertale. In this game you play as a ghost that appeared in the Outbound; a world populated by ghosts of the afterlife. You soon meet a few other friendly ghosts where the common goal is finding closure with their deaths. As you help your friends, you'll find enemies along the way which you'll fight in a Paper Mario style turn-based team battle, but more Pokemon-like because only your Figments fight for you.		<small>READ MORE</small>

<small>POSTED: DECEMBER 8</small> Do not...I repeatDO NOT BUY THIS GAME! This game is literally shovelware that a BS publisher launched without the permission of the developer. There is currently legal action being taken by the developer. From a gameplay perspective it feels like a real early alpha that should not have seen the light of day. It looks great...play's like a horrible rip off of paper mario complete with no items, shoddy AI fights, No memorial characters and no real depth to the story. please do not buy this game. If you want to see work from the dev I recommend you look at there work directly but not from this publisher.		<small>READ MORE</small>

POSTED: DECEMBER 9 Don't buy this game until the developer regains control from the publisher, or manages to release independently. What  Such a shame because it is a great game.

Intro	
I've never played Paper Mario, but I understand that it is also turn-based, and what seems to be heavy inspiration for The Outbound Ghost.	
I'll say if, hypothetically, The Outbound Ghost and Paper Mario were a 1:1, even as a new player, I wouldn't want to check Paper Mario out. This game does just enough things either frustrating or short of the mark that I found my time wasn't entirely well-spent, nor particularly memorable. I enjoyed the journey, unremarkable as it was, but that's all. One of these styles of games in my life is enough for me, and I suppose I spent that

I'm only giving this a positive review because I could see what the developers wanted this to be, and I really want more devs to pursue this game style, but this was not a well-planned experience.	
I'd been following this one for a long time on Twitter and I always expected it to be the next big Paper Mario tribute, but I judged it too early. Even after reading all the bad reviews, I had no idea how disappointed I was going to be. It's a bummer, because it really had a foundation for something great.	
The visuals are beautiful, but generic and thematically inconsistent. The writing is concise, but bland and dry.

I wish there was a neutral option honestly but overall I did enjoy most of the game, and I do stress the word MOST. There is a part of the game where you play different characters and you will realize an immense amount of stuff has happened to the main character with little to no story or background behind it. What actually drove me to some anger was the ending where your thrown into random areas with little to no understanding and are unable to explore in some cases. The timeline doesn't add up, there is a ton of unanswered questions I found and I was honestly not satisfied as to why everyone including our main character is being turned into a demon through the eyes of another. Now I 100% know they are setting it up on purpose for DLC and probably needed to release this for some cash flow to
